

ATS Compatibility Report

PREPARED FOR
Srinivasan Raghavan

DATE OF ANALYSIS
2 August 2026

OVERALL SCORE
87/100

EXECUTIVE SUMMARY

This resume was analysed against 6 enterprise ATS platforms. 6 of 6 returned a passing score. The average compatibility rating is 87/100, classified as Excellent. Taleo scores lowest at 82/100, so the recommendations below are ordered by the impact they would have there first.

1. PLATFORM COMPATIBILITY SCORES

PLATFORM	OVERALL	FORMAT	KEYWORDS	SECTIONS	EXPER	EDUC	QUANT	STATUS
Workday	84	95	60	100	100	90	67	PASS
Taleo	82	95	60	100	100	90	67	PASS
iCIMS	89	96	62	100	100	90	67	PASS
Greenhouse	96	98	72	100	100	90	67	PASS
Lever	86	98	72	100	100	90	67	PASS
SuccessFactors	86	95	60	100	100	90	67	PASS

2. RECOMMENDATIONS FOR IMPROVEMENT

01 Heavy use of all-caps text

Affects: Workday, Taleo, iCIMS, Greenhouse, Lever, SuccessFactors

3. KEYWORD COVERAGE

FOUND (35)

airflow, artificial intelligence, aws, azure, bigquery, ci/cd, code review, data pipeline, data warehouse, docker, fastapi, gcp, git, github actions, java, jenkins, kubernetes, llm, machine learning, matlab, mongodb, mysql, natural language processing, numpy, pandas, postgresql, power bi, python, pytorch, r, react, scikit-learn, sql, system design, tensorflow

NOT FOUND (12)

c#, c++, go, javascript, kotlin, perl, php, ruby, rust, scala, swift, typescript

4. METHODOLOGY

Each platform score is a weighted composite of six dimensions: formatting compliance, keyword match, section structure, experience quality, education completeness and quantification. Weights, parsing strictness and keyword-matching strategy differ per platform and are derived from publicly documented parsing behaviour. Scores are produced by a deterministic rule-based engine; where an AI pass is available it may adjust each score by at most 15 points with stated evidence. Pass thresholds are set per platform rather than at a single cutoff.
