ATS Compatibility Report

PREPARED FOR	DATE OF ANALYSIS	OVERALL SCORE
Srinivasan Raghavan	August 3, 2026	80/100

EXECUTIVE SUMMARY

This resume was analysed against 6 enterprise ATS platforms. 6 of 6 returned a passing score. The average compatibility rating is 80/100, classified as Good. Taleo scores lowest at 72/100, so the recommendations below are ordered by the impact they would have there first.

1. PLATFORM COMPATIBILITY SCORES

PLATFORM	OVERALL	FORMAT	KEYWORDS	SECTIONS	EXPER	EDUC	QUANT	STATUS
Workday	73	95	38	100	100	90	67	PASS
Taleo	72	95	38	100	100	90	67	PASS
iCIMS	84	96	38	100	100	90	67	PASS
Greenhouse	89	98	44	100	100	90	67	PASS
Lever	81	98	44	100	100	90	67	PASS
SuccessFactors	79	95	38	100	100	90	67	PASS

2. RECOMMENDATIONS FOR IMPROVEMENT

- 01

Add the requirements this posting names that your resume does not
Missing from your resume: microservices, code review, distributed systems, agile, observability, c++ and 4 more.
Affects: Workday, Taleo, iCIMS, Greenhouse, Lever, SuccessFactors

CRITICAL
- 02

Convert tables to plain text
Replace the 'PROJECTS' table with plain text descriptions to ensure all project details are parsed correctly
Affects: Taleo

HIGH
- 03

Clarify employment dates
Ensure all roles have clear start and end dates to facilitate the construction of a complete employment timeline
Affects: SuccessFactors

HIGH
- 04

Put numbers on more of your bullet points
7 of 14 bullets carry no figure — a percentage, a count, an amount or a duration.
Affects: Workday, Taleo, iCIMS, Greenhouse, Lever, SuccessFactors

MEDIUM
- 05

Reorganize skills section for clarity
Consider using clear headings for technical skills, programming languages, and tools to improve parseability
Affects: Workday

MEDIUM
- 06

Emphasize transferable skills
Highlight skills from the 'AI Intern' experience that are directly applicable to the job description, such as cloud-native architectures and microservices
Affects: iCIMS

MEDIUM
- 07

Optimize skills for semantic matching
Use synonyms for skills like 'cloud-native architectures' and 'microservices' to improve matching with the job description
Affects: Lever

MEDIUM
- 08

Heavy use of all-caps text
Affects: Workday, Taleo, iCIMS, Greenhouse, Lever, SuccessFactors

3. KEYWORD COVERAGE

FOUND (7)

artificial intelligence, aws, ci/cd, code review, java, python, sql

NOT FOUND (9)

agile, c#, c++, distributed systems, go, microservices, observability, rust, typescript

4. METHODOLOGY

Each platform score is a weighted composite of six dimensions: formatting compliance, keyword match, section structure, experience quality, education completeness and quantification. Weights, parsing strictness and keyword-matching strategy differ per platform and are derived from publicly documented parsing behaviour. Scores are produced by a deterministic rule-based engine; where an AI pass is available it may adjust each score by at most 15 points with stated evidence. Pass thresholds are set per platform rather than at a single cutoff.
